

PROFESSIONAL SUMMARY

Web Developer with 4+ years of experience and 50+ live websites delivered across static, dynamic, and custom-built platforms. Owns projects end-to-end — requirement gathering, frontend and backend development, server provisioning and deployment, CRM/API integration, analytics, and SEO. Currently leads a five-person development team and manages a live portfolio of six production client properties. Builds AI-assisted capability in production — RAG chatbots, LLM integrations and AI agent tooling — alongside deep, hands-on infrastructure and DevOps ownership. Background in Aeronautical Engineering and Quality Assurance brings a process-driven, root-cause debugging discipline to every project.

CORE TECHNICAL SKILL SET

Frontend

HTML5, CSS3, JavaScript (ES6+), TypeScript; Tailwind CSS, Bootstrap, responsive & mobile-first design; React.js, Next.js, component architecture, SSR/SSG; DOM manipulation, Fetch API, GSAP, SVG/CSS animation, scroll animation, micro-interactions.

Backend & APIs

Python, FastAPI, Core PHP (advanced), Node.js, Laravel (familiar); REST & CRUD API design, async programming, JWT/OAuth, SSE/WebSockets, third-party API integration, file upload APIs.

AI & Agents

LLM fundamentals, prompt engineering, RAG, embeddings, vector databases; LLM APIs (OpenAI, Claude, Gemini); function/tool calling; LangChain, LangGraph, agent memory, multi-agent systems, MCP; AI-assisted development workflows.

Databases

MySQL — schema design, complex queries, performance tuning; PostgreSQL, SQL; Redis; pgvector for vector search; backup, restore, import/export, query optimization.

Integrations

Microsoft Dynamics 365 (Dataverse), Power Apps, Power Automate, Power BI; GA4 / Google Tag Manager; career-form APIs with full server-side validation, webhooks; Exelare ATS integration.

Cloud & DevOps

Docker / Docker Compose, Git & GitHub, Linux (Ubuntu, Rocky), Nginx, Apache, PHP-FPM, Google Cloud Platform, CI/CD; SSH, SSL/TLS with automated renewal, DNS, reverse proxy; PM2, cron automation, Redis, OPcache.

Security

SSL/HTTPS enforcement, Cloudflare (incl. Turnstile), reCAPTCHA; IP rate limiting, MX validation, disposable-email blocking, honeypot fields; input validation, secure headers, OWASP fundamentals, malware cleanup and post-incident recovery.

SEO & Performance

Technical SEO — robots.txt, XML sitemaps, canonical URLs, structured data/schema markup, crawl & indexing optimization; Google Search Console; Core Web Vitals, Lighthouse/PageSpeed audits, TTFB optimization, lazy loading, image optimization, critical CSS, gzip/Brotli, CDN strategy.

Analytics & Monitoring

GA4 and Google Tag Manager; GoAccess — real-time dashboards, automated daily/monthly reports with Excel & Word export, GeolP tracking; Prometheus and node exporter, centralized log analysis (Apache/Nginx/PHP), uptime & error monitoring, root-cause analysis.

Design & UX

UI/UX design, wireframing, visual hierarchy, typography, color theory, spacing & design systems; SaaS/enterprise UI, dashboard design, landing pages & hero sections; Figma, Canva, Adobe Photoshop, Illustrator.

Tools & AI-Assisted Workflow

VS Code, GitHub Desktop, Postman, Chrome DevTools, FileZilla, Cloudinary; AI coding assistants — ChatGPT, Claude, Gemini, GitHub Copilot, Cursor AI, Windsurf AI.

Leadership & Process

Team lead for a five-person development team; primary client-facing technical contact; concurrent management of six production properties; root-cause debugging methodology; technical documentation and professional writing.

SELECTED PROJECTS

Six production properties I run, plus work in build

| Project                 | What it is                                                                                                                                        | URL                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| AI Agent                | Self-hosted assistant answering from your own documents with citations — FastAPI, LangGraph, pgvector, JWT, SSE/WebSockets, Docker Compose        | <a href="https://github.com/jeevithkumarjt/ai-agent">github.com/jeevithkumarjt/ai-agent</a>           |
| SEO Audit Dashboard     | <b>In progress.</b> Crawl, ranked issue list with a plain-language fix, rank history, Core Web Vitals — FastAPI, Playwright, Next.js, TimescaleDB | <a href="https://github.com/jeevithkumarjt/seo-dashboard">github.com/jeevithkumarjt/seo-dashboard</a> |
| Lead & Form Attribution | <b>In progress.</b> Tracing every form submission back to the channel, campaign and page that produced it                                         | in build                                                                                              |
| Product Analytics       | <b>In progress.</b> Self-hosted event tracking and funnels for the platforms I run                                                                | in build                                                                                              |
| Tryvium                 | Production property — features, AI agents, technical SEO, performance, deployments                                                                | <a href="https://www.tryvium.ai/">https://www.tryvium.ai/</a>                                         |
| Eprotech                | Production property — features, CRM integration, infrastructure ownership                                                                         | <a href="https://www.eprotech.ai/">https://www.eprotech.ai/</a>                                       |
| Sensiple                | Production property — backend, database architecture, analytics, server management                                                                | <a href="https://www.sensiple.com/">https://www.sensiple.com/</a>                                     |
| Phifix                  | Production property — features, performance, production support                                                                                   | <a href="https://www.phifix.com/">https://www.phifix.com/</a>                                         |
| CloudSens               | Production property — end-to-end build, cloud infrastructure, deployments                                                                         | <a href="https://www.cloudsens.ai/">https://www.cloudsens.ai/</a>                                     |

|           |                                                                                                |                                                                                               |
|-----------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Quinovate | Production property — custom development, technical SEO, server ownership                      | <a href="https://www.quinovate.ai/">https://www.quinovate.ai/</a>                             |
| Portfolio | My portfolio and resume site — hand-written HTML, CSS and JavaScript, deployed on GitHub Pages | <a href="https://github.com/jeevithkumarjt/Portfolio">github.com/jeevithkumarjt/Portfolio</a> |

The three dashboards are unfinished, so they are marked *in progress* rather than claimed. Notable initiative: architecting a Next.js/Turborepo monorepo migration strategy for Tryvium's B2B SaaS platform — stack selection, hosting and long-term maintainability, not just implementation to spec.

PROFESSIONAL EXPERIENCE

Web Developer Mar 2025 – Present

Sensiple Software Solutions

- Team lead for a five-person development team — task assignment, output review, and delivery ownership across concurrent client projects.
- Primary client-facing technical contact: requirement-gathering meetings, progress communication, translating business needs into development tasks.
- Builds and maintains custom, database-driven websites end-to-end using Core PHP, MySQL, HTML5, CSS3, JavaScript, and React/Next.js front ends.
- Integrates REST APIs and CRM platforms (Power Apps / MS Dynamics 365), including a custom career-form API with full server-side validation.
- Owns the full server and deployment lifecycle — Apache, Nginx, PHP, MySQL, SSL, cPanel/WHM, DNS, Google Cloud Platform — with no separate ops team.
- Designed and deployed a production-grade GoAccess analytics system: real-time dashboards, GeoIP tracking, automated daily/monthly reports with Excel & Word export.
- Drives on-page and off-page SEO and Core Web Vitals improvements using caching, image compression, and code minification.
- Diagnoses and resolves live production incidents (500/502/503 errors, SSL and permission failures, mail deliverability issues) to maintain uptime.
- Building RAG-based AI chatbot capability and exploring a Next.js/Turborepo monorepo migration for the team's SaaS platform.

Web Developer Dec 2023 – Feb 2025

DS Enterprises

- Designed, built, and shipped 20+ responsive HTML websites and 15+ custom content-driven sites from scratch, end-to-end.
- Built mobile-first, cross-browser-compatible sites using Bootstrap and custom CSS for a range of small-business clients.
- Built dynamic, database-driven pages and custom components; owned content modeling and templating across client sites.
- Owned ongoing maintenance, updates, and performance debugging across a portfolio of live client sites.
- Produced web-optimized visual assets in Photoshop and Illustrator, consistently delivering all projects on schedule.

Web Developer — Intern Aug 2023 – Nov 2023

DS Enterprises

- Built and maintained websites using HTML, CSS and JavaScript, while learning digital marketing fundamentals to support client online presence.

Trainee — Software Testing Oct 2022 – Apr 2023

Accord Info Matrix Pvt. Ltd.

- Trained in manual and automation testing fundamentals — foundational QA exposure that informs a detail-oriented approach to debugging and cross-browser testing.

Quality Associate Dec 2020 – Dec 2021

Delphi TVS Technologies Limited

- Applied 7QC tools and TQM methodology via SAP; maintained quality documentation and conducted audits in a high-precision manufacturing environment.

Technical Trainee —

Aerotics Technologies

- Completed Aerospace Technical Publication training.
